

ORNAMENTAL IRON AND WIRE WORK

BADGER WIRE & IRON WORKS
MILWAUKEE ~ WISCONSIN

Foreword

IN PRESENTING THIS CATALOGUE of Ornamental Iron and Wire Work to our customers and the trade in general, we wish to express our appreciation of the business we have been favored with in the past. To merit further friendly relations shall continue to be our aim.

While the size of the catalogue precludes showing everything within the range of our facilities, we are in hopes that it will give a fairly comprehensive idea of our principal products. We maintain a thoroughly competent engineering force for the preparation of special drawings that may be required to suit the needs of each particular prospect.

Our shop facilities are second to none. Your orders will be executed by capable mechanics and consequently we can and do guarantee our products to give entire satisfaction in every respect.

We will quote prices f.o.b. Milwaukee or at your own receiving point. In cases where the size of the job warrants, we will, if desired, quote price erected.

In ordering or writing for price send full particulars and accurate measurements, also diagram or drawing if necessary to convey your meaning. Be very explicit so there will be no necessity for further correspondence or chance of error in executing an order.

As quantity and size have a considerable bearing on cost, most items shown in this catalogue are not priced. We shall, however, be pleased to quote upon receipt of particulars covering your requirements.

Terms, 30 days net to those having approved credit.

Prices are subject to change without notice.

ORNAMENTAL AND MISCELLANEOUS IRON WORK AND WIRE WORK

furnished by BADGER WIRE & IRON WORKS

NO. 5 WROUGHT IRON CURTAIN ROD AND BRACKETS

NO. 6 WROUGHT IRON CURTAIN ROD AND BRACKETS

Write for prices, stating length required. We have numerous drawings on file showing other designs of curtain rods and shall be glad to send blueprints upon request to anyone interested.

NO. 41 BENT STEEL PLATE THRESHOLD. *Stock widths 4 and 5 inches.*

NO. 42 PLAIN BRASS THRESHOLD. *Stock widths 4 and 5 inches.*

NO. 43 FLUTED BRASS THRESHOLD. *Stock widths 4 and 5 inches.*

The thresholds shown above are carried in stock and prompt shipment can be made. These will be furnished at the lowest prices prevailing at time of shipment.

No. 25 FOLDING GATE

The No. 25 Folding Gate shown in the adjoining illustration is intended for small size opening. Regularly made with $\frac{5}{8}$ " x $\frac{3}{16}$ " flat steel, provided with hinges and hasps for pad-lock fastening.

Price, per square foot \$1.35

Very small gates are charged at a higher rate.

No. 29 SINGLE FOLDING GATE

Made with $\frac{3}{4}$ " channel uprights, filling bars of $\frac{5}{8}$ " x $\frac{3}{16}$ " flat steel.

Price, per square foot..\$1.65

Very small gates charged at a higher rate.

No. 27
DOUBLE FOLDING
GATE

Made with $\frac{3}{4}$ " channel uprights, filling bars of $\frac{5}{8}$ " x $\frac{3}{16}$ " flat steel. Price, per square foot....\$1.65

Very small sizes charged at a higher rate.

No. 28
DOUBLE FOLDING GATE

This is the same construction as the No. 27 shown at the top of this page, except in addition overhead track is furnished. This is more particularly desirable for wide openings. Price, per square foot.....\$1.65

HANGERS AND OVERHEAD TRACK extra, according to the width of opening and style of track furnished.

No. 686 IRON WINDOW GUARD

No. 687 IRON WINDOW GUARD

No. 684 IRON WINDOW GUARD

No. 682 IRON WINDOW GUARD

Designs Nos. 682 and 684 can be made of either round or square uprights. Nos. 686 and 687 are made with square uprights. $\frac{1}{2}$ " uprights with $1\frac{1}{2}$ " x $\frac{3}{8}$ " cross bars are standard construction, but $\frac{5}{8}$ " or heavier can be furnished and are frequently used.

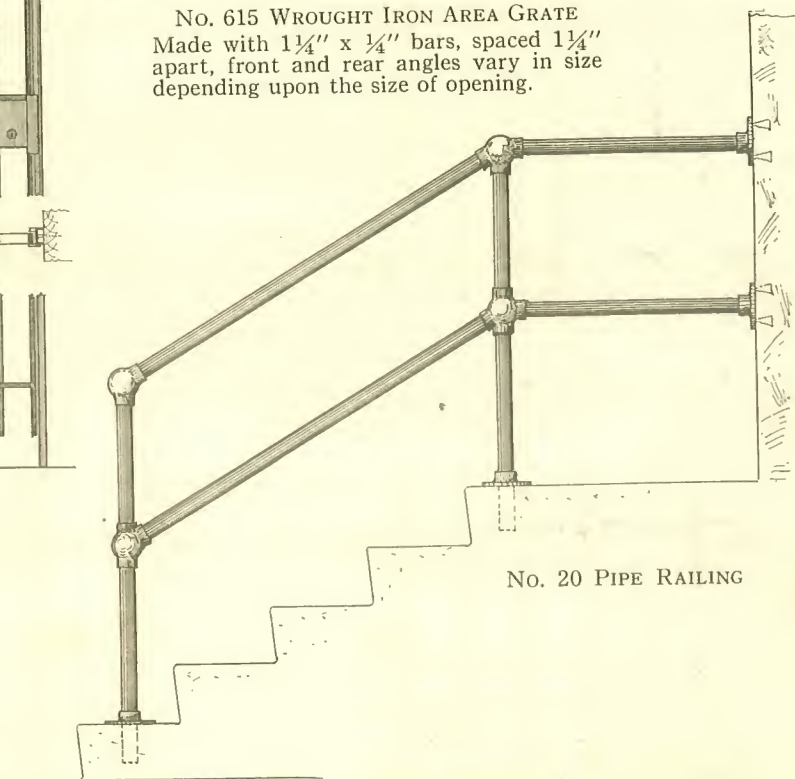

No. 685 IRON DOOR

Regularly made with $\frac{1}{2}$ " square uprights, $1\frac{1}{2}$ " x $\frac{3}{8}$ " flat frame and cross bars, or with channel frames and cross bars.

No. 615 WROUGHT IRON AREA GRATE
Made with $1\frac{1}{4}$ " x $\frac{1}{4}$ " bars, spaced $1\frac{1}{4}$ " apart, front and rear angles vary in size depending upon the size of opening.

No. 20 PIPE RAILING

No. 24 PIPE RAILING

PIPE RAILING can be made of any size of pipe that may be required and can be furnished with Globe fittings, as shown, or with plain fittings.

NO. 27 STEEL FIRE SHUTTERS

Made of No. 14 sheet steel as standard construction.
Price, per square foot.....\$1.65
These can be made of lighter or heavier steel sheets
according to the requirements.

NO. 23 DESIGN CHECKERED PLATE SIDE-WALK DOOR

Thickness of plate depending upon the size of door.
Properly reinforced with 3" angle frame and hinges
as shown.
Price, per square foot.....\$6.00
Flush hinges at an additional charge.
Very small doors figured at a higher rate.

NO. 22 COAL HOLE RINGS AND COVERS

Approximately 18", 20", 24" and 30" in diameter.
Exact dimensions and other information will be
furnished promptly upon request.

NO. 21 CAST IRON WHEEL GUARD

Height 24", diameter at base 12".
Other patterns can be made up specially to order.

No. 80 SPIRAL STAIR

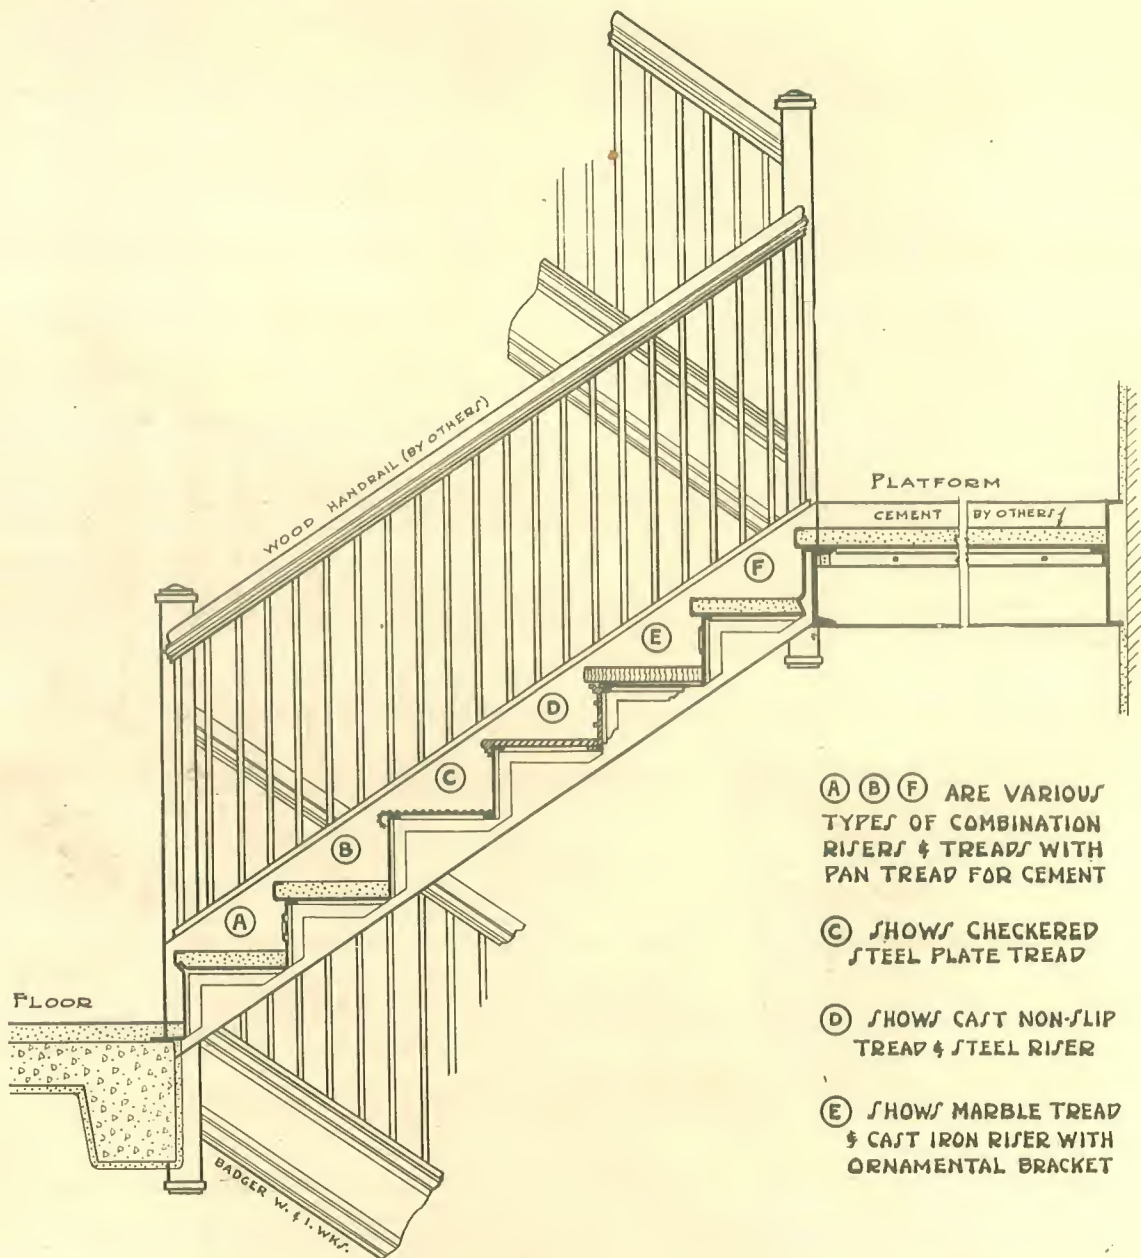

This type is particularly suitable when the space is limited, making it impossible to place the usual type of stair. They can be made in any height. This type of stair can be furnished from stock patterns in 4'0", 4'6", 5'0" and 6'0" diameter. The 5'0" diameter is most frequently used. Treads are of cast iron with checkered surface to prevent slipping.

In writing for prices, state height from floor to floor and diameter wanted.

A more ornamental design of railing can be substituted for the plain tubular railing shown in the illustration.

BADGER PRESSED STEEL STAIRWAYS

(A) (B) (F) ARE VARIOUS
TYPES OF COMBINATION
RISERS & TREADS WITH
PAN TREAD FOR CEMENT

(C) SHOWS CHECKERED
STEEL PLATE TREAD

(D) SHOWS CAST NON-SLIP
TREAD & STEEL RISER

(E) SHOWS MARBLE TREAD
& CAST IRON RISER WITH
ORNAMENTAL BRACKET

The illustration shows a number of types of stairway construction. The stringers are made of steel channels. The exposed stringers are generally furnished with moulding. The risers are made of No. 12 steel plate, either plain or paneled and the pan treads are of the same material. The treads for type "C" are made of $\frac{3}{16}$ inch diamond-checked plate, while type "D" is of cast iron. Badger Pressed Steel Stairs have been tested and proven to stand a far greater load than they could possibly be subjected to in use. We are prepared to furnish full size details of the various types. Architects and contractors are requested to send us plans for estimate. Erection included in our quotation when desired, but the stairs are easy to erect. The different parts are marked to correspond with marks on erection drawing which we furnish, insuring proper placing of the various parts.

IRON BALUSTRADE RAILINGS

On this page are shown designs of Balustrade Railings which have proven very popular. We solicit inquiries for this class of work from architects, contractors, or owners. Where required, we deliver and erect, if the contract is of sufficient size to warrant the incidental expense involved.

No. 2 BALUSTRADE RAILING

No. 6 BALUSTRADE RAILING

No. 11 BALUSTRADE RAILING

We make Stairs and Balustrade Railings from the plainest to the most ornamental designs, following strictly the architects' drawings and specifications.

We guarantee entire satisfaction in every respect.

Your inquiries will be given prompt and careful attention.

FIRE ESCAPES

The above illustration shows typical fire escape from second story exit to grade. The construction is as light as is consistent with safety. Specifications covering proposed construction will be furnished promptly on request. The construction of fire escapes vary according to the specifications provided by the various states. We are in a position to quote on any construction. Be sure to state city or town where the fire escape is to be installed. In ordering or writing for price give the following information:

- Width of exit opening.
- Length of Platform.
- Width of Platform.
- Distance from sill to ground or to next exit opening.
- Thickness of wall.

It is desirable that a sketch showing that portion of the building where the fire escape is to be placed accompany the inquiry. We will upon receipt of the necessary information prepare drawing and submit blueprint for approval of the customer.

No. 30
PIPE HAND
RAILING

Made of tubing of
any desired size.
Can be furnished
of steel or brass
tubing.

No. 805 SWIMMING POOL LADDER
Tubular side bar with cast steps.
State dimensions required in
writing for price.

ORCHESTRA RAIL.

ORCHESTRA RAIL

WASHBURN & MOEN STEEL WIRE GAUGE

WASHBURN & MOEN GAUGE is the standard for steel wire and all our quotations are based upon the Washburn & Moen Gauge, unless we distinctly mention some other gauge. Since the American or Brown & Sharp Gauge is in most cases considerably lighter than the corresponding number of Washburn & Moen Gauge, our customers and the trade are cautioned to make sure that all bidders figure on identical sizes of wire. Below are shown thickness of various gauges of wire by Washburn & Moen Gauge, also several other gauges.

Approx. Fraction of Inch	Number of Wire			Diameter in Decimals of Inch (W.&M. Gauge)	Weight per 100 ft. in lbs. (W.&M. Gauge)	Diameter in Decimals of Inch		
						American or Brown & Sharp Gauge	U. S. Stand- ard Gauge	Birming- ham or Stub Gauge

Showing section of Guard with
No. 21 CHANNEL FRAME
and method of securing
wires through frames.

WIRE WINDOW GUARDS are only made to order and in any size and shape to fit windows. In ordering, or writing for price, specify gauge of wire to be used, size of mesh wanted and either No. 20 Round Frame or No. 21 Channel Frame, whichever may be desired. Give exact dimensions the guards are to be and state which measurement is the width (horizontal) and which is the height (vertical). Note the importance of giving correct measurements as guards cannot be altered after made without considerable expense and frequently alterations are not possible at all. In every case we will assume that the measurements specified are to be the extreme outside dimensions of the completed guards.

Guards with No. 21 Channel Frames must be made so as to fit into the openings while guards with No. 20 Round Frames may fit into the openings or may be made to lap over so as to be fastened to the face of woodwork. Staples are furnished with No. 20 Round Frame Guards, a sufficient supply accompanying each shipment. If preferred and specially ordered, No. 20 Round Frame Guards can be equipped with eyelets to permit fastening by means of wood screws.

Regular finish—Black. If some other color is wanted, it should be specified in ordering.

NO. 617 VENT GUARD

1"x1"x $\frac{1}{8}$ " Angle Frame, Rosettes at corners.
 $\frac{1}{4}$ "x $\frac{1}{16}$ " Flat Wire, $1\frac{1}{4}$ " Mesh, per sq. ft., \$1.00
 $\frac{5}{16}$ "x $\frac{1}{16}$ " Flat Wire, $1\frac{1}{2}$ " Mesh, per sq. ft., 1.00

Above cut shows section of Vent Guard set into opening. In ordering, always specify sizes of openings. We will make the necessary allowances to insure a proper fit.

NO. 51 FLAT WIRE GRILLE

$\frac{1}{4}$ " x No. 16 flat wire, $1\frac{1}{4}$ " square mesh.
 $\frac{5}{16}$ " x No. 16 flat wire, $1\frac{1}{2}$ " square mesh.
 $\frac{3}{8}$ " x No. 16 flat wire, 2" square mesh.
 Channel or angle frame.

NO. 52 FLAT WIRE GRILLE

$\frac{1}{4}$ " x No. 16 flat wire, $1\frac{1}{4}$ " square mesh.
 $\frac{5}{16}$ " x No. 16 flat wire, $1\frac{1}{2}$ " square mesh.
 $\frac{3}{8}$ " x No. 16 flat wire, 2" square mesh.
 Channel or angle frame.

NO. 53 FLAT WIRE GRILLE

$\frac{3}{8}$ " x No. 16 flat wire, 2" square mesh, scroll border as shown.
 Channel or angle frames.

GRILLES shown above can be furnished in any of the standard finishes of steel or of solid brass or bronze.

WIRE RAILINGS

In ordering, or writing for price, ground plan on the order of the one here shown, should be submitted. The following information should also be given:

1. The design of Railing (by catalogue number) also the height wanted.
2. Location and sizes of openings.
3. Whether ends of Railings, where there are no returns, finish against wall or other surface to which they can be attached. In that case end bars would be provided with screw holes. If such ends are exposed, however, it may be necessary to provide cover bar and in some cases bracing.
4. If the top of desk or counter is not level, send elevation showing the extent of the drop, so the return ends may be made accordingly.
5. In cases where doors or swinging panels are specified, the plan should show the side on which the hinges are to be and the direction in which such doors or panels are to swing.
6. Where special equipment is wanted, full particulars should be given. This pertains particularly to locks. Regular equipment for doors is butt hinges and mortise Night Latch, operating by means of key from the outside and by knob from inside of the enclosure.

Partition Railings are generally made with a space of three or four inches between bottom bar and floor to permit sweeping beneath.

No. 1 DESK OR COUNTER RAILING

Made of No. 12 wire, $1\frac{1}{4}$ inch mesh, $\frac{5}{16}$ inch round frame. Regular Finish—Black.

15 inches high, per lineal foot.....	\$.53	24 inches high, per lineal foot.....	\$.72
18 inches high, per lineal foot.....	.60	30 inches high, per lineal foot.....	.87
21 inches high, per lineal foot.....	.66	36 inches high, per lineal foot.....	1.00

EXTRAS:

Cash Openings, each.....	.80
O. G. Return Ends (in addition to charge for lineal measurement), each.....	.80

This style of railing is desirable where a serviceable, low-priced article is wanted. Eyelets are attached to frame so the railing can be secured to counter by means of wood screws.

NOTE: Above prices do not apply if front of railing is less than 6 feet in length.

NO. 2 DESK OR COUNTER RAILING

Made of No. 12 wire, $1\frac{1}{4}$ inch mesh, $\frac{5}{16}$ inch Round Frame. Regular Finish—Black.

15 inches high, per lineal foot.....	\$.72	24 inches high, per lineal foot.....	\$.93
18 inches high, per lineal foot.....	.80	30 inches high, per lineal foot.....	1.06
21 inches high, per lineal foot.....	.87	36 inches high, per lineal foot.....	1.20

EXTRAS:

Cash Openings, each.....	.80
O. G. Return Ends (in addition to charge for lineal measurement), each.....	.80

This railing is attached to counter by wood screws through eyelets attached to bottom frame.

NO. 3 DESK OR COUNTER RAILING

Made of No. 12 wire, $1\frac{1}{4}$ " mesh, $\frac{3}{4}$ "x $\frac{3}{8}$ " Channel Iron Frame, $\frac{3}{4}$ "x $\frac{1}{8}$ " Cover Bar at top. Regular Finish—Black.

15 inches high, per lineal foot.....	\$1.33	24 inches high, per lineal foot.....	\$1.53
18 inches high, per lineal foot.....	1.40	30 inches high, per lineal foot.....	1.65
21 inches high, per lineal foot.....	1.47	36 inches high, per lineal foot.....	1.80

EXTRAS:

Cash Openings, each.....	2.00
O. G. Return Ends (in addition to charge for lineal measurement).....	2.00

This railing is secured to desk by means of wood screws through holes drilled in bottom frame.

IN ORDERING, OBSERVE DIRECTIONS GIVEN ON PAGE 54.

NOTE: Above prices do not apply if front of railing is less than 6 feet in length.

NO. 4 DESK OR COUNTER RAILING

Made of No. 12 wire, $1\frac{1}{4}$ inch mesh, $\frac{3}{4}$ "x $\frac{3}{8}$ " Channel Iron Frame, $\frac{3}{4}$ "x $\frac{1}{8}$ " Cover Bar and Cast Pickets at top. Regular Finish—Black.

15 inches high, per lineal foot.....	\$1.47	24 inches high, per lineal foot.....	\$1.65
18 inches high, per lineal foot.....	1.53	30 inches high, per lineal foot.....	1.80
21 inches high, per lineal foot.....	1.59	36 inches high, per lineal foot.....	1.90

EXTRAS:

Cash Openings, each.....	2.00
O. G. Return Ends (in addition to charge for linear measurement).....	2.00

This railing is of the same construction as the No. 3 shown on the preceding page, with the addition of cast pickets at top.

NO. 6 DESK OR COUNTER RAILING

Made of $\frac{5}{16}$ "x $\frac{1}{16}$ " flat wire, $1\frac{1}{2}$ inch square mesh, $\frac{3}{4}$ "x $\frac{3}{8}$ " Channel Iron Frame. Cover Bar and Cast Pickets at top. Regular Finish—Black.

18 inches high, per lineal foot.....	\$1.65	27 inches high, per lineal foot.....	\$1.87
21 inches high, per lineal foot.....	1.72	30 inches high, per lineal foot.....	1.93
24 inches high, per lineal foot.....	1.80	36 inches high, per lineal foot.....	2.07

EXTRAS:

Cash Openings, each.....	2.00
Cash Openings, with door, each.....	8.00
O. G. Return Ends (in addition to charge for linear measurement).....	2.00

Note directions, Page 54, for information to be given in ordering or writing for price.

NOTE: Above prices do not apply if front of railing is less than 6 feet in length.

NO. 25 FLOOR RAILING

No. 8 wire, 2½ inch mesh, 1"x½" Channel Frame. Regular Finish—Black.

30 inches high, per lineal foot.....\$1.50	42 inches high, per lineal foot.....\$ 2.00
36 inches high, per lineal foot..... 1.75	48 inches high, per lineal foot..... 2.25
Gate equipped with Secret Latch (in addition to charge for linear measurement)..... 10.00	

NO. 24 FLOOR RAILING

No. 9 wire, 2 inch mesh, 1"x½" Channel Iron Frame, Cover Bar and Cast Pickets at top. Regular Finish—Black.

30 inches high, per lineal foot.....\$1.75	42 inches high, per lineal foot.....\$ 2.25
36 inches high, per lineal foot..... 2.00	48 inches high, per lineal foot..... 2.50

NO. 27 FLOOR RAILING

Made of ⅜"x½" flat steel wire, 2 inch mesh, 1"x½" Channel Iron Frames. Regular Finish—Black.

30 inches high, per lineal foot.....\$2.25	42 inches high, per lineal foot.....\$ 3.00
36 inches high, per lineal foot..... 2.65	48 inches high, per lineal foot..... 3.35
Gate equipped with Secret Latch (in addition to charge for linear measurement)..... 10.00	

BADGER STANDARD SECTIONAL PARTITIONS

These standard sections are adapted principally for tool and stock room enclosures. Every section alike—they are interchangeable, can be rearranged without drilling or fitting. Just place in position and bolt to adjoining section.

Made of No. 10 wire, W. & M. Gauge, $1\frac{1}{2}$ " diamond mesh, 1" channel frames, horizontal stiffening bar at center. Flanges for wood or concrete floor are provided.

Regular finish—Special Mineral Paint—Black.

Prompt shipment from stock.

PRICE

Standard size, 4 feet by 8 feet, each.....\$10.00

SWING DOORS

Each swing door is provided with butt hinges and mortise night latch to operate by means of key from outside and with knob from the inside. A sheet iron lock guard is provided to prevent tampering with lock.

The swing door assembly takes up the same space as a regular 4 ft. wide section. The height of door opening is 7 feet so there is a stationary panel 1 foot high above the door.

Price, Swing Door Assembly,
each.....\$30.00

SLIDING DOORS

Each sliding door is equipped with ball bearing hangers, track and high grade bronze sliding door lock.

Operates easily and cannot get out of order.

Track is level so door will remain stationary at any position desired.

Each sliding door assembly takes up the same space as a regular 4 ft. wide section. The door opening is 7 ft. high.

Price, Sliding Door Assembly,
each.....\$40.00

NO. 29 WIRE PARTITION

Made of No. 10 wire, 1½ inch mesh, 1"x½" Channel Iron Frame, Cover Bar and Cast Pickets at top. Regular Finish—Black.

Per square foot.....\$.50 | Extra for door with usual hinges and lock...\$20.00

This style is extensively used for factory tool room or cloak room partition. Effectively guards the desired space without obstructing the light.

NO. 28 CAGE WORK

Upper portion made of flat steel wire, crimped and interwoven to square mesh; lower portion of round wire, diamond mesh, 1"x½" Channel Iron Frames. Regular Finish—Black.

Upper Section, per square foot.....\$.80 | Lower Section, per square foot.....\$.45

Extra for Sliding Door, with usual track, hangers and lock.....30.00

WIRE SIGNS

We make a specialty of the manufacture of Wire Signs and have furnished some of the largest in use. Generally made of galvanized wire in steel channel frame, in panels of convenient length, which in erecting are bolted together. The letters are of galvanized sheet steel, securely wired to the mesh work.

Wire signs are superior in many respects to wood signs. They can be made larger without risk of being damaged by wind. The lettering is legible at a far greater distance. In writing for price state length, height and lettering wanted, also whether sign is to be placed on ridge roof or on flat roof. Also state whether the sign is to be placed in center of roof or near the edge so we may figure the proper bracing. Complete information and price will be quoted upon receipt of particulars.

1 inch Mesh,
No. 11, Galvanized

5/8 inch Mesh,
No. 15, Galvanized

2 Mesh,
No. 14, Galvanized

4 Mesh,
No. 19, Galvanized

6 Mesh,
No. 24, Galvanized

8 Mesh,
No. 26, Galvanized

No. 5 wire, 1 inch space.

No. 8 wire, 3/4 inch space.

WIRE CLOTH

We can furnish wire cloth of any description. In ordering or writing for price give the following information:

- 1—The number of lineal feet wanted and the width.
- 2—The mesh, which is the number of openings to the lineal inch from center to center of wire, or give the size of openings in the clear between wires.
- 3—The gauge of wire wanted, (see illustration page 49).
- 4—Specify material, that is, whether plain steel, galvanized, brass or copper.

If not sufficiently familiar with wire cloth to order by the above directions, state for what purpose same is to be used. This may enable us to determine the proper grade.

No. 10 wire, 1/2 inch spaces.

No. 11 wire, 3/8 inch space.

No. 13 wire, 1/4 inch spaces.

JAIL CELLS and EQUIPMENT

Our Number 20 Catalogue

which contains complete information
